ACEM SITE SUPERVISION COURSE

ACEM is conducting a series of **Site Supervision Courses** designed to provide the **Graduate Engineers, Engineering Technologists and Inspector of Works (IOW)** with the necessary practical knowledge and information related to good engineering practice in the site supervision using proper procedures and reporting to meet the approved design, drawings and specification.

The overall programme consists of **General** and **Discipline Modules** corresponding to the disciplines registered with the Board of Engineers Malaysia (BEM).

The three (3) programmes for the **Discipline Modules** are as follows:

- (a) Civil & Structural
- (b) Mechanical
- (c) Electrical

Participants are encouraged to attend the **General Module** and **one of the Discipline Modules** as per their registration with BEM to have a complete and comprehensive knowledge regarding site supervision. All the above courses shall be conducted as a series of webinars consisting of **lecture** and **Q&A**, to facilitate affordable on-line courses.

DISCIPLINE : GENERAL MODULE

The general module is divided in **four (4) webinars** conducted in June to August 2022 as per course contents shown in the table.
